Here is everyman.
Someday, some viruses manage to enter his body.
When they have grown enough and reached vital organs, he has to go urgently to the ER. His life may be in danger.
Periodic vaccination is needed to protect over time people health, and prevent from the virus to attack the individual.
Cyber crime against companies of all sizes, all kinds

60% of SME die after a cyber attack

Cost of Cybercrime

CAGR: 26%
